PROFILE SUMMARY

Senior Full Stack Engineer and UI/UX Developer with 5+ years of experience designing and building enterprise web products for healthcare, e-commerce, Salesforce, and banking clients in the UK and US. Frontend specialist in Angular (14–20, Signals) and React with TypeScript, RxJS, and NgRx, and full stack capable with Java/Spring Boot REST APIs and MySQL. Turns Figma designs and business requirements into accessible, responsive, user-centric interfaces backed by reusable design systems and component libraries. Works directly with clients from requirements and demos through production release, and leads framework upgrades, testing practices, and frontend modernization.

EXPERIENCE

HealthFirst Technologies Pvt Ltd

Senior Product Engineer

Hyderabad

Sep 2024 – Present

- Lead frontend architecture, UI/UX, and end-to-end delivery for enterprise healthcare applications serving UK clients, owning technical and design decisions from requirements to production release.
- Built healthcare applications from scratch using Angular 20, TypeScript, and SCSS, establishing scalable component systems and configurable application foundations.
- Work directly with clients on requirement gathering, weekly demos, and product discussions, translating business needs into technical and UX solutions; coordinate tasks across stakeholders, backend, and frontend teams.
- Designed and built responsive, accessible, user-centric interfaces from Figma using UX principles, including dynamic forms, calendars, filters, and custom animations, reducing task completion time for key workflows by ~20%.
- Built a reusable design system and in-house component library with design tokens, cutting UI development time by ~30% and reducing dependency on third-party UI libraries.
- Defined API contracts, TypeScript interfaces, and integration models with backend teams, streamlining frontend–backend communication and accelerating feature delivery.
- Led Angular major-version upgrades and adoption of Signals, reducing bundle size by ~25%, and introduced unit testing (Jasmine/Karma), raising coverage to over 60%.
- Mentor junior developers through code reviews and use AI-assisted workflows (Cursor, Claude) for prototyping, refactoring, and test generation.

Girnar Newtel Solutions Pvt Ltd

Software Engineer (Full Stack)

Hyderabad

Jun 2022 – Aug 2024

- Developed full stack enterprise e-commerce and Salesforce-integrated applications for US clients, with Angular, TypeScript, RxJS, and NgRx on the frontend and Java and Spring Boot on the backend.

- Built reusable components, responsive customer-facing interfaces, and optimized user journeys, reducing page load time by ~30% and ensuring cross-browser compatibility.
- Designed and maintained RESTful APIs in Spring Boot with validation, security, and exception handling, and optimized MySQL queries on high-traffic endpoints.
- Delivered Angular upgrades, REST API integrations, and performance optimizations, and maintained legacy JSP/Servlet modules alongside new Angular UIs.
- Collaborated with product owners, designers, and backend teams on business-critical features; wrote unit tests (JUnit, Jasmine, Karma) and took part in code reviews and Agile ceremonies.

Achala IT Solutions

Associate Software Engineer

Hyderabad

May 2021 – May 2022

- Developed banking and financial applications for US clients using Angular, TypeScript, RxJS, HTML, and CSS, with secure and responsive user interfaces.
- Implemented business-critical features, production fixes, and REST API integrations, ensuring secure and stable application behaviour.
- Took part in sprint planning, debugging, production support, and feature delivery in an Agile team.

Rugas Technologies Pvt Ltd

Full Stack Developer Intern

Bangalore

2020

- Contributed to a full stack e-commerce application, building frontend features in Vue.js and backend services in Feathers.js (Node.js).

TECHNICAL SKILLS

- **Frontend:** Angular (14–20), Angular Signals, React, React Hooks, TypeScript, JavaScript (ES6+), RxJS, NgRx, HTML5, CSS, SCSS, Angular Material, Reactive Forms, Lazy Loading, Vue.js
- **UI/UX:** Figma, Design Systems, Design Tokens, Reusable Component Libraries, Responsive & Mobile-First Design, Accessibility (WCAG), Prototyping, Custom Animations
- **Backend:** Java, Spring Boot, RESTful APIs, API Contract Design, Node.js (Feathers.js), JSON, JSP/Servlets
- **Databases:** MySQL, SQL
- **Testing & Quality:** JUnit, Jasmine, Karma, Unit Testing, TDD, Debugging, Code Reviews
- **Tools & Platforms:** Git, CI/CD, AWS, VS Code
- **AI-Assisted Development:** Cursor AI, Claude, ChatGPT, Prototyping, Refactoring, Test Generation
- **Practices:** Agile (Scrum/Kanban), System Design, Web Performance Optimization, Application Security, Client Collaboration, Mentoring

EDUCATION

Rajiv Gandhi University Of Knowledge Technologies

Bachelor's Degree in Computer Science, GPA: 9.0

IIIT, Nuzvid

2017–2021
