PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building scalable, enterprise-grade web applications across healthcare, e-commerce and financial services for UK and US clients. Strong professional expertise in Angular, TypeScript, JavaScript, RxJS and NgRx, with hands-on React.js experience through modern application development using React Hooks, React Router and TypeScript. Skilled in frontend architecture, reusable component libraries, responsive UI development, REST API integration, performance optimisation and accessible design. Experienced in collaborating with cross-functional teams, translating business requirements into intuitive user experiences and delivering production-ready applications.

TECHNICAL SKILLS

Frontend: Angular (14–20), Angular Signals, Standalone Components, RxJS, NgRx, Reactive Forms, Angular Material, Angular CDK, Lazy Loading; React, React 18, React Hooks, Context API, React Router, React Hook Form, Zod, Material UI

Languages & Styling: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Responsive and Mobile-First Design

UI/UX: Figma, Wireframing, User Flows, Interactive Prototypes, Design Systems, Design Tokens, Component Libraries, Accessibility (WCAG), Micro-interactions

Testing & Quality: Vitest, React Testing Library, Jasmine, Karma, Unit Testing, TDD, Code Reviews, Debugging

Tools & Delivery: Git, GitHub Actions (CI/CD), Vite, Angular CLI, VS Code, REST API Integration, Web Performance Optimisation, Agile (Scrum/Kanban)

AI-assisted Engineering: Cursor, Claude, Claude Code, ChatGPT; AI-assisted prototyping, refactoring and test generation

PROFESSIONAL EXPERIENCE

HealthFirst Technologies Pvt Ltd
Hyderabad, India

Senior Product Engineer (Frontend and UI/UX)
Sep 2024 – Present

- Lead frontend architecture, UI/UX and end-to-end delivery for enterprise healthcare applications serving UK clients, contributing to technical and design decisions from requirements through production release.
- Built healthcare applications from scratch using Angular 20, TypeScript and SCSS, establishing scalable component architecture and configurable application foundations.
- Designed user flows, wireframes and interactive prototypes in Figma, then developed responsive, accessibility-minded interfaces including dynamic forms, calendars, filters and custom animations; reported approximately 20% improvement in task completion time on key workflows.
- Built a reusable design system and in-house component library with design tokens, reducing UI development time by approximately 30% and dependency on third-party UI libraries.
- Led Angular major-version upgrades and adoption of Signals; reported approximately 25% bundle-size reduction, and introduced Jasmine/Karma unit testing with coverage above 60%.
- Worked directly with clients on requirements, weekly demos and product discussions; defined API contracts and TypeScript interfaces with backend teams.
- Supported junior developers through code reviews and used AI-assisted workflows for prototyping, refactoring and test generation.

Girnar Newtel Solutions Pvt Ltd
Hyderabad, India

Software Engineer (Frontend)
Jun 2022 – Aug 2024

- Developed e-commerce and Salesforce-integrated enterprise applications for US clients using Angular, TypeScript, RxJS and NgRx.
- Built reusable UI components and responsive customer-facing interfaces; optimised user journeys and reported approximately 30% reduction in page load time.
- Managed complex application state with NgRx and RxJS and integrated REST APIs end to end, collaborating with backend teams on API contracts.
- Delivered Angular upgrades and performance improvements while maintaining legacy JSP/Servlet modules alongside new Angular interfaces.
- Collaborated with product owners and designers on business-critical features; wrote Jasmine/Karma unit tests and participated in code reviews and Agile ceremonies.

Achala IT Solutions
Hyderabad, India

Associate Software Engineer
May 2021 – May 2022

- Developed banking and financial applications for US clients using Angular, TypeScript, RxJS, HTML and CSS, delivering secure and responsive user interfaces.
- Implemented business-critical features, production fixes and REST API integrations, supporting stable application behaviour.
- Participated in sprint planning, debugging, production support and feature delivery within an Agile team.

Rugas Technologies Pvt Ltd Bangalore, India
Software Developer Intern (Frontend) 2020

- Built frontend features for an e-commerce application using Vue.js.

PROJECTS

Job Application Tracker | React.js

React 18, TypeScript, Vite, React Router, Material UI, Tailwind CSS, dnd-kit, React Hook Form, Zod, Recharts, Vitest, React Testing Library
yellareswaribatta.github.io/job-application-tracker

- Designed and developed a responsive Kanban-style job application tracker with accessible drag-and-drop interactions for mouse, touch and keyboard, including undo for moves.
- Built validated forms using React Hook Form and Zod, including a helper to prefill fields from pasted job adverts.
- Created an analytics dashboard with response-rate metrics, hiring-funnel visualisation and weekly goals using Recharts.
- Implemented light/dark mode, five colour themes and JSON, CSV and calendar (.ics) export.
- Implemented browser-local demo authentication using salted PBKDF2 via the Web Crypto API; added tests with Vitest and React Testing Library and deployed through GitHub Actions.

Personal Portfolio | Angular

Angular 21, Signals, Angular CDK, TypeScript, SCSS | yellareswaribatta.github.io

- Designed and built an interactive, accessibility-minded portfolio with token-based theming, drag-and-drop components, scroll-driven animations and an animated SVG guide character.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, IIIT Nuzvid Andhra Pradesh, India
Bachelor's Degree in Computer Science | GPA: 9.0 2017 – 2021
